Welcome to a demonstration of the new Security Question functionality in EAS (Enterprise Authentication Service); this is the application that you use to authenticate into Banner and other enterprise-level applications.

This demo walks through the initial setup of Security Questions and Answers.
There are two ways to initially set up your Security Questions:
1) you can choose to, at any time, by clicking on the "Establish / Update Your Security Questions" Check box when you log in
2) when you're due to have them established, EAS may take you directly to the set-up screen after you've logged in
Enter Password and press Login Button

Enter EnterpriseID:
